---

PhD Candidates of the selected “Core PhD Programmes” or in a PhD programme within the EIT Health eligible to be a member of the consortium

The healthcare industry has a strong need for young scientists who, next to bringing expert knowledge from academia, can also connect laterally to other people and disciplines. This ambitious goal can only be achieved by a dedicated curriculum, including expert learning modules and webinars based on real-life cases involving industry stakeholders and cross-collaboration between a diverse group of talents. ”
